About Tilden.

CHICAGO, April 15.—The *Times* has definite knowledge that Tilden has by no means given up his presidential aspirations and that on the contrary he is sanguine as ever. His disease is not paralysis but Bright's disease of the kidneys. He does a tremendous amount of work and uses stimulants freely. He exercises daily on horseback, but always closely followed by an attendant, for his friends fear he will some day fall from his horse in a fit of weakness. His most trusted friends are Henry Waterson, Andrew H. Green and Abram S. Hewett, with whom he has become reconciled and is on intimate terms.

BY ATLANTIC CABLE.

The Pending Premiership

LONDON, April 15.—The *Times* in a leading article this morning says that whoever may be sent for first by the queen it seems to be understood that in a very real sense the decision will rest with Gladstone, and that Gladstone is not yet committed to an absolute determination on the matter. It is maintained that very great pressure will be put on him to accept officially responsibility which he cannot really escape.

Otero Executed.

MADRID, April 14.—Otero who attempted to assassinate King Alphonso on the evening of December 30th as the royal carriage containing the king and queen was passing through the palace gate, was executed this morning. At the time he was arrested Otero gave his age as nineteen. The authorities mostly present on such occasions were on the scaffold, in front of which a large crowd assembled. Perfect order was maintained. A final visit was made to Otero by Duke de [illegible], grand chamberlain, who remained twenty minutes with him. It is not known whether or not the prisoner made any disclosure.

Capital Punishment in Spain.

MADRID, April 15.—In congress to-day Car... Vignaux took up his run where he left it last night and ran 80 points, making a total of 1531 points without a miss. Slosson made a great effort to restore his fortune and succeeded in achieving a run of 1103 points, during which he was repeatedly cheered. Vignaux, however scored the 800 required for last night and won the match. In to-night's play Slosson scored 1080 points, which added to his previous count makes a total of 3118. At the conclusion of the match Slosson asked Vignaux to give him his revenge. Vignaux has not agreed to do so yet, but it is probable that the encounter will be resumed in a fortnight.

The resolution was adopted 5 to 1. Caucus nominees were ratified by the convention as delegates to Chicago. The convention then voted on delegates at large and J. S. Clarkson of Des Moines, S. M. Clark of Keokuk, D. B. Henderson of Dubuque and Geo. D. Perkins of Sioux City were chosen, all Blaine delegates receiving 755½ votes against 152½ votes for the Grant delegates. After recess James Speed was made permanent chairman and a report from the committee on credentials was adopted excluding Grant delegates from the Louisville district. More excitement ensued when the committee on resolutions presented a majority report favoring Grant instructions and a minority report favoring no instructions.

Pataha correspondence: A most shocking accident happened to Mr. Levi Thornton about 5 o'clock Saturday evening, while driving a cow near Mr. Wheeler's on the Pataha. He was seen by Mr Wheeler to ride into a small gulch, and in a few minutes the cow appeared on the other side but nothing was seen of Thornton. Mr. Wheeler thinking it a little strange went to see if anything was wrong, when he found Thornton lying on the ground with his ribs and chest crushed in, supposed to have been caused by the horse falling on him. Thornton died the next morning without recovering consciousness. He leaves a wife and several children to mourn his untimely end.

Southern Oregon

A shooting affray occurred at Jacksonville last Saturday night between John Lathrop and Wm. Caldwell, in which the latter was seriously and perhaps fatally shot. The shooting resulted over some trivial affair. Lathrop has been arrested and lodged in jail to await the result of Caldwell's injuries.

Jon Forbes of Paisley while hunting came upon a bear unexpectedly, having time enough merely to fire one shot, which fell short of the desired effect, leaving the hunter in a hand to-hand encounter with the enraged bruin, driven to desperation by her bleeding wounds. She fastened her teeth upon his head, tearing the scalp and cutting the face up fearfully. The flesh was also torn from the calf of one leg. He fell upon his face, feigned death, and the bear, after growling fiercely over him for a moment fled for the woods again. He was carried home by a friend who soon after found him and though severely hurt will recover.

A Proposition to make two States of California

SACRAMENTO, April 15.—[illegible] Mr. Delvalle, while smarting under the defeat of ... [illegible] ... introduced to-day.

WHEREAS, It is known beyond question that the interests and necessities of the people of different sections of this state cannot be made to harmonize; and

WHEREAS, It has been conclusively demonstrated in this and previous legislative sessions that the interests of the southern part of the state are steadily ignored and voted down without due consideration, and that regard for justice which is the right of the people of all sections; and

WHEREAS, The people of that section are compelled to pay their proportion of the revenues by which other sections of the state are benefited while the people of the southern section receive no benefits therefrom; therefore

Resolved by the Assembly, the Senate concurring, That a commission of three members be appointed by the governor to take under consideration the advisability and necessity of a division of the state and that said commission be directed to report their conclusions to the next legislature.

Delvalle introduced his resolution to appoint a commission to investigate the advisability of dividing the state. On motion it was referred to the Los Angeles delegation.

SACRAMENTO, April 15.—In the assembly to-day Finlayson offered the following resolutions:

Resolved, By the assembly of California, that the discontinuance of the letter service of Wells, Fargo & Co. would be a great deprivation to the business interests of the Pacific coast and of no corresponding benefit to any interest.

Resolved, That our senators and representatives in congress be requested to use all means in their power to prevent such discontinuance.

Resolved, That the governor is hereby requested to forward copies of these resolutions to our senators and representatives in congress and also a copy to the honorable postmaster general of the United States.

The Columbia Bar

[From the Oregon City Enterprise.]

Much writing and talking is going on between those interested in the shipping on the Columbia river. Adverse opinions are rife, but we are of the opinion that the Columbia river bar and its approaches are the same now as they have ever been unless there has been some extraordinary convulsion of nature in that locality. Only a few months ago many were loud in their advocacy of the security of ships in crossing the Columbia bar who are now saying just the contrary. Can it be that there is an ulterior motive in this? Is it possible that persons in Portland are in league with others at Astoria to obtain a large appropriation for the building of a breakwater or system of jetties out of which they expect a divvy? If the Columbia bar had a tug of the requisite power and competent pilots who were not in the employ of the tug boat proprietors we should hear of no more disasters than we hear of at the entrance to New York harbor or at the Golden Gate, but just as long as the tugs are the size of punts and pilots are in cahoots with their owners, so long shall we hear of disasters at the mouth of the Columbia.

The English Elections

[From the Chicago Times.]

The jingoes are getting a decided and unexpected set back all over Great Britain and Ireland. While the war fever was on, Beaconsfield was a bully boy among the blowers and strikers of English politics as well as among the upper classes. But the bills are coming in now and John Bull never did like bills.

[illegible]

Slightly Mixed

From the Utica Herald Rep

While Secretary Boutwell is advocating the election of Gen. Grant for president on the ground that he alone can put down the dangerous plans of the south, others who have quite as much right to speak for the third term movement claim that he will carry many southern votes and those of ex-confederates [illegible] any other republican candidate. Why has this matter claim so much [illegible]?

George Bancroft, Robert C. Winthrop, Charles Francis Adams, James Russell Lowell, Benjamin R. Curtis, Oliver Wendell Holmes and Edward Everett were members while in college of the Harvard Hasty Pudding Club, which was organized in 1795, and intend to build a club house.

Prof. Agassiz is said to receive an income of $2,500 a day from the Calumet and Hecla copper mines of Lake Superior, of which he is president and a shareholder. He bought at five cents on the dollar, seeing the value of the mines when they were selling at that figure.

Miles; assessor, Orin Johnson; superintendent of schools, —Glendye; surveyor, A. H. Powell; coroner, R. F. Fullerton.

FRIDAY MORNING APRIL 16 1880

EDISON'S NEW ENTERPRISE

A few days ago we had by telegraph the announcement that agents of Edison were on their way from the east to Oroville Cal with a mill for extraction of gold from tailings by the electro-chemical process which the thaumaturgist of Menlo park has recently discovered. Great expectations are formed of the result. Though he appears not yet to have succeeded in perfecting the electric light which was ~~to revolutionize illumination~~ and knock exacting and despotic gas companies on the head he seems confident that he has struck another source that promises results as great as he ever anticipated from electric illumination. Through the New York *Herald* the results of this latest alleged discovery are made known to the public, though the process is a secret which Edison does not as yet care to reveal. In his search for a supply of platinum for his electric lamp he caused explorations to be made among the refuse of auriferous quartz or sand from which gold miners had extracted as much of the precious metal as it was possible for them to get in the present condition of the art. These tailings have always been known to contain more or less gold. But they have been regarded as worthless since nothing more could be extracted from them by the operations of the mills. Platinum was found in small quantities in the tailings of the gold mines and Edison commenced experimenting to find the best method for extracting it. He was surprised at the large quantity of gold which he was able to extract from the rejected residue of the mines and at once set about perfecting a plan for separating the gold from the refuse. His labors were finally crowned with success and he has struck a bonanza the magnitude of which is beyond computation. Such, at all events is what he professes to believe and the claim seems far less improbable and extravagant than that of many other alleged discoveries.

At all the principal mines in the gold producing regions, including many mines long since abandoned, there are immense deposits of tailings, and before he announced his discovery and while it was still supposed that he was searching only for platinum Edison made contracts for great bodies of these tailings at several points in California obtaining them, of course for very trifling sums. Now it is asserted, incredible as the statement may appear, that Edison can take up the tailings and extract from them much more gold than they were made to give out originally. The average yield of the gold bearing rock, crushed and reduced under the milling process has been perhaps no more than twenty dollars a ton. Specimens of the tailings are said to have yielded under Edison's treatment at the rate of seven hundred and fifty dollars a ton; the black sand from the lava beds, eighty dollars a ton, and one specimen of tailings yielded at the rate of fourteen hundred dollars a ton. The estimated expense of the process is only five dollars a ton—a cost which is as nothing compared with even the lowest yield. It requires a stretch of credulity to accept these results as real, and yet the account is given in the most circumstantial manner on the direct authority of Edison himself. Most readers will, however, prefer to wait for results, since experience has proven that Edison has heretofore been quite too enthusiastic in his "claims" of great discoveries and results.

It is undoubtedly true that immense quantities of gold lie in the refuse ore and sand, to extract which has heretofore been deemed impossible. Nor does it so far exceed the limits of belief that new processes should be discovered by which it can be extracted. The agents which Edison claims to employ in this work are electricity and chemistry. The process is known only to himself and a few trusted assistants. He simply shows results. Taking a quantity of tailings utterly destitute of further value, so far as the ordinary processes are concerned, he subjects it to his manipulation and produces the precious metal in astonishing quantities. The results were such that he could not at first believe his own senses, and it was only after repeated experiments on a number of different samples that he was assured of the reality of his discovery.

Mr. Edison says his process is not exactly milling, although the tailings pass through a mill. It is unlike all other known processes, of which there are many. He further states that no process is alike suited to all kinds of tailings, and the process which now works so successfully on one kind would totally fail on others. He and those associated with him estimate that they have secured enough tailings at one mine alone in California to yield them $50 000,000. If his process can be adapted so as to extort all the hidden treasure from the immense deposits of hitherto worthless material lying about on the surface of the ground in the gold-producing regions, he will revolutionize the mining business. But the commerce of the world increases at so rapid a rate that it would easily take up all the additional gold that could be thrown into the channels of business from all quarters without any serious disturbance of monetary values. Such has been the experience heretofore, when new discoveries have threatened to supply an excess of gold. Still, there is great room to doubt Edison's success. As there is yet something to be done in the matter of perfecting the electric light so it may be taken for granted that the alchemist of Menlo park has not yet discovered that stone at the touch of which all baser metals may be changed into gold,—the stone which

GEN. GRANT AND THE SOUTHERN STATES

Kentucky and Missouri, two states in which the small minority of the people who constitute the republican party is dominated by the remnants of the old whisky ring, have elected delegates to the Chicago convention under instructions for Grant. In neither of these states has Grant or any other candidate who may be named at Chicago, the smallest chance of a single electoral vote. In fact it is not possible to keep up anything like an efficient organization of the republican party in either Kentucky or Missouri and the electoral tickets in those states will be nothing better than a farce, to be buried under mountainous democratic majorities. Yet Kentucky and Missouri, jointly, will have fifty four votes in the Chicago convention,—no insignificant power. The question will arise whether states which can possibly give Grant no electoral votes shall force him on the convention as a candidate against the protest and the vote of those states to which the candidate must look solely for support. The most ardent boomer for Grant would hardly have the face to deny that it would look better [illegible] which are sure to throw from 60,000 to [illegible] democratic majority each, to be somewhat more modest in the matter of pushing an objectionable candidate upon those states which are the only dependence of the republican party for the election.

Not a sure republican state except Pennsylvania, has yet instructed for Grant, and there the instructions were carried entirely by machine pressure, through which the republicans of the state were denied a voice in the selection of delegates, which power was usurped by county committees under direction of the Cameron ring and used to forestall and stifle the wishes of the party. Beyond New York and Pennsylvania the machine states and northern state will instruct for Gr[illegible] while the [illegible]. Republican states which should name the candidate because they must elect are all against him. Iowa and Kansas instruct for Blaine. Indiana and Rhode Island are also for him. Massachusetts and Vermont instruct for Edmunds. Connecticut is divided but gives Grant not a single delegate. Reports from Ohio, Illinois and Michigan show that no Grant delegate will be sent by either of those states, and in general it may be said that the Grant boom so far as the northern states are concerned has completely spent its force. Grant will get no more delegates except from the south, where he cannot obtain a single electoral vote. Where then is the universal and spontaneous call of the people which was to make him president again? The alleged spontaneity is a most ludicrous or even pitiful thing to behold. The overwhelming demand for Grant is confined to two northern machine states where with all possible appliances of ring pressure instructions were carried by bare majorities and to democratic southern states where no republican electoral vote is possible under any circumstances.

Oregon is so strongly opposed to Grant that there should be no doubt of her delegation to Chicago. The state convention should allow no juggle to defeat the wishes of the republicans of the state. We have advised heretofore against instructions but if there be any doubt whatever, the instructions should be given. Grant if nominated, can not carry Oregon. It is just as well to say this plainly now and to act in accord with it as a fact, as to cherish any delusion about it and awaken to the reality at a later day. Our election in June will take place two or three days after the Chicago nomination shall have been made. Should Grant be nominated what republican can say with confidence that the state will elect a republican congressman, judiciary and legislature in June? A defeat then so soon after the convention would be an extremely bad start for November.

In an article in the current number of *Potter's American Monthly*, Gen. Brisbin attempts to prove that the Indian is of Asiatic origin. In summing up his facts he says: "Perhaps the strongest proof that our Indians are from Asia is in the fact that the nomadic tribes of Alaska are related to the Kamtchatkans, and even now pass and repass Behring straits. A tribe has lately been found in Alaska speaking the same language that is spoken in Kamtchatka, and still further as if to remove all obstacles to the belief that the North American Indian is from Asia, I am assured many tribes on both sides of the straits are identical in manners, habits and customs. While the geography of the western hemisphere was unknown the origin of our Indians could not be otherwise than a matter of conjecture, but now that the locality of tribes and the characteristics of our country are known we can with almost certainty establish the nativity of the red man."

Remarking on the fact that the democrats at their state convention made no nomination of prosecuting attorney for his district the Oregon City *Enterprise* says: "This is supposed to be a bait to the republicans for them not to put anyone in nomination against Judge Bellinger. The republicans have such a clear majority in this judicial district that we are most earnestly and decidedly opposed to any scheme for dividing such important offices, and in so saying, we are echoing the sentiments of every one but perhaps those of the ring. If the rings are going to do all the nominating, the only way to teach them a lesson is to let them do all the voting. After one trial at that, they might possibly be willing to allow the people to have a say."

Will that absurd exodus investigation never end? The entire failure of the senate committee to discover any political motive for the exodus of negroes from the south will probably take the movement out of politics and place it where it belongs, among the rational and intelligible internal migrations of population which are a distinct feature in the social life of this continent. Negroes who can better their condition by coming north will do so, as New Englanders who find advantages in the change will come west and demagogues will not meddle in the matter, either to encourage or hinder.

Attention is called to the fullness and variety of our special market reports, published to day. The matter they contain is made up with special reference to the wants of this locality. These reports are exclusively our own, and will be found especially complete and valuable.

NEW CHANNEL AT THE COLUMBIA'S MOUTH—A gentleman whose official position and experience in maritime affairs gives his expressions more weight and entitles them to more than usual notice stated to an OREGONIAN reporter yesterday that he was convinced that the Columbia river was cutting a new channel through the middle sands He gave it as his opinion based on actual observation that Sand island and Clatsop spit were steadily moving north that the north channel was growing narrower that ebb tides could not find an exit through the north channel and flowed out through the middle sands, and over Clatsop spit that the middle sands were probably covered with a hard crust which the current now had not force enough to break that in the natural course of events the body of water will force its way through the weakest portion of the barrier viz midway between the middle sands and Sand island and that the June rise in the Columbia will open a safe, deep, and direct channel to the sea He states that he is confirmed in that opinion because it will be only a repitition of the experience of 1841 He believes that a survey between the middle sands and Sand island will show to-day sixteen feet clear at low water all the way across

BRIGHT PROSPECTS IN WASCO COUNTY—Mr A. H. Breyman, a prominent merchant of Prineville Wasco county arrived in the city last evening. He reports that the large purchases of cattle in his district has put a great deal of money into circulation Messrs Haas & Evans, cattle buyers of Council Bluffs Iowa arrived recently with $200 000 which they are rapidly paying out Prices paid are from 10 to 20 per cent. higher than last year Mr Breyman reports some losses to sheep and cattle in Harney valley, Beaver creek, Grant county, and Goose Lake, Lake county by reason of severe storms Considerable money has been advanced on the wool clip, and taken all in all, the prospects for the coming season in that portion of Wasco county have not been so bright for many years past.

A GENEROUS LAD—Among the contributions to the Irish famine fund acknowledged by the *Catholic Review* we notice one from the young son of Gen O O Howard Alluding to this generosity on the part of a child the *Review* says "We believe that it will interest our readers to know that this sum represents the savings of a little boy who is neither Irish nor Catholic, but who, having heard from an Irish friend some of the brave deeds of the Irish and some of their present sufferings, insisted that his nurse should send the accumulations of his penny bank to the Irish poor. Need we say that there is a future in store for that generous lad"

AT SPIRITUAL RETREAT—At the Spiritual Retreat now in progress at the cathedral, all the reverend clergy of the city are present and also Very Rev B DeLorme, V G of St Paul, Rev J. Heinrich of Roseburg Rev L Gandon, of The Dalles, Rev A G Vermeesch of St. Louis Rev E Hermas, of Cornelius, Rev V Capelle of Salem, Rev P. Stampfl, of Sublimity, Rev A J Croquet of Grand Ronde and Rev P F Gibney of McMinnville

CHANGES IN STEAMSHIP OFFICERS—Captain Charles Thorn of the *California* on the return passage of the ship from Alaska will leave with his wife and accomplished daughter, Miss Minnie, for San Francisco and will probably return to the east Captain James Carroll, of the *Alex Duncan*, will take charge of the *California* and Captain J E Dennie of the lighthouse tender *Mary Taylor*, will take command of the *Duncan*

TO BE DEDICATED—Says the *Catholic Sentinel* "On next Sunday the Catholics of St Louis, Marion county will have the happiness to see their new church dedicated to the service of Almighty God at the hands of Archbishop Seghers The ceremonies will commence at 9 30 A M and will be followed by high mass. His Grace will preach on this occasion"

CIRCUIT COURT—Judge Deady will announce a decision in this court this morning in the Pacific Rolling Mills case upon the application to lease the Dayton Sheridan and Grand Ronde Railway Company to the Oregon Railway Company Limited and in Cutting v Cutting

NEAT CARDS—Messrs Swope & Wittley have just opened a new book and job office at No. 33 Stark street, opposite Ladd & Tilton's bank, and are prepared to do anything in their line Some very handsome visiting cards were left at this office as specimens of their work.

INSANE PATIENT—Wednesday evening last Sheriff Aiken brought down Miss Adelia Lechner of Spencer creek who was examined on a charge of lunacy She was adjudged insane and committed to the asylum

HARNESS FOR THE O R R—Mr J B Congle sold yesterday to the Oregon Railway Company, limited, seventy sets of scraper harness which will be forwarded to the front without delay.

BUSINESS NOTICES

Now is the time to secure good bargains. He means business for his immense stock must be closed out before the arrival of the next invoice to make room for new stock

E B Lin, of the Suit House corner of Third and Alder streets makes an announcement in another column in which the ladies of Portland and Oregon are personally interested. He employs only first-class workmen and does only first-class work. The Suit House keeps a full line of dresses, dolmans, silk outfits etc. Reference can be had from the leading ladies of Portland as to the superiority of the cutting and fitting. THE YAMHILL NARROW GAUGE

The Whole Matter will Probably be Definitely Settled To-day.

[illegible]

Mr F G Hughes attorney for the road stated that he would not propose [illegible] Hughes replied [illegible] item a [illegible] premature [illegible] should have waited a day or two with its publication

An attorney in this city representing the interests of the Pacific Rolling Mills Company states that the contract of his company was to deliver the rails at the dock in San Francisco which it did in the time specified The orders by the railroad company were to ship by the *Great Republic* but the steamship agents declined to accept the iron unless they had no guarantee that the freight would be paid

Application was made in the U S District court for an order to lease the road and the matter referred to W B Gilbert master in chancery who after taking testimony recommended that such order be issued. The Oregon Railway Co bid $60 000 for the lease and $17 000 for the rolling stock—$87 000 in all which it claims is the amount really due the rolling mill

If readers can make the above statements consist and ascertain the exact status of the road they are welcome to do so The decision to be given by Judge Deady to day will probably settle the matter and end all contradictory talk

PERSONAL.

Mr Theo Mausfield has just returned from a trip through the valley and will be in the city for about six weeks.

Archbishop Seghers returned home on Monday morning last and is engaged during the week in conducting the spiritual retreat for the catholic clergy

Says the Salem *Statesman* A recent number of the N Y *Times* referring to the proposed work of the coming general conference of the M E church speaks of the probability of the election of Rev C C Stratton as a bishop of that denomination The Pacific coast claims recognition and proposes to present him as its unanimous choice The people of Salem among whom Dr Stratton is so well and favorably known will hail with pleasure any proposition looking toward this end His ability and his untiring industry in the work of the church both as a minister and as an educator entitle him to the choicest rewards that it is in the power of his denomination to bestow

Appreciation of Values.

By reference to *The Oregonian* of Feb 18th it will be found that city property has advanced twenty five per cent during the past year As there has been no excitement the rise is wholly attributable to the increasing immigration and the growing confidence inspired by our numerous railroad enterprises and the development of our many natural resources that have hitherto slumbered for lack of energetic men to develop them

It is True,

That of all real estate investments the homestead plan is the best and safest as all who invest are interested in making the whole property more valuable To illustrate suppose A builds a house on his lot and Browne lot adjoining, B gets the benefit of A's improvement while A is not injured thereby This philosophy will apply to the entire property

We have donated a lot to each of the principal church [illegible] for church purposes

The local money market exhibits no new features of importance. The call from all sources is rather lighter than was expected and considerable sums, which had been husbanded to meet the demand expected to arise from the movement of the salmon and wool crops, are idle, while portions of it are offered on real estate or other eligible security. Rates on loans and discounts remain at 10@12 per cent per annum, with no difficulty in the way of borrowers who are able to proffer the requisite collateral securing all needed accommodation.

The trade in general merchandise during the week under review this evening has been only moderately active. Groceries have not fluctuated in any important sense, the volume of the movement being a little larger than the average of former seasons, but not larger than was expected.

In domestic produce but few features of general interest are noticeable. Wheat has been gradually tending downwards, and some holders have been obliged to sell at a good deal less than is currently believed to be the market price. One lot of fair valley wheat was sold to day at $1 60, though it is not claimed by the most "bearish" that such a figure correctly represents the market. However, it would be a chance if fair merchantable wheat could be placed at over $1 65@1 67½. It is claimed by some shippers who have endeavored to obtain vessels, that the country will have to attribute this marked decline to the fact that vessels over a certain draft have been virtually excluded from our port by the various representations made concerning the entrance to the Columbia river. It is too important a matter for the press of the country to pass in a trifling or inconsiderate manner, and and though we cannot overlook the fact that some of the newspapers of Oregon have, it may be unwittingly, done an injury to the state by the circulation of reports concerning the bar yet, all the harm is not attributable to the press. Our own board of trade has evidently made a mistake and in order to refute the revived declaration of this board made six or seven years ago, we append herewith a list of those vessels which have this year arrived and departed from the Columbia river within the time inhibited, drawing a greater draft of water than the 20½ feet advised as a maximum by them. Can any intelligent person after reviewing it, conclude that such a declaration was called for, or judicious? Let it be remembered that probably not one vessel in ten plying the waters of the world in long voyage employment draws over 20½ feet loaded, and not one in fifty in excess of 23½ feet, and it will be seen that for average facilities, with even but 20½ feet of draft, but few vessels would be turned away from our shores, but with the list before us it is patent that scarcely a vessel that floats need apprehend more than ordinary delays in visiting the Columbia river. The proposition that the bar is shallowing is a transparent humbug, and the recent declaration of the *Astorian* is a confession in that direction by slily substituting the river channel rather than the bar as its point of attack, and all the ground the *Astorian* has for its hue and cry in favor the subsidy to improve the mouth of the river is, that just behind Sand Island the channel into Baker's Bay shows 17 feet at low water. This is at a point where no swells from the ocean reach being protected by Sand Island; and at high water gives 27 feet of channel into Baker's Bay, from whence the broad north channel to the ocean shows from 21 to 30 feet at low water. We can but repeat that the Columbia river bar answers at all times of the year, except in stormy weather, for a larger class of vessels than ever have used it yet.

Of these vessels, to only one occurred any accident, and an official inquiry into that case showed that the cause was the incompetency, carelessness or gross negligence of the pilot in charge. The figures speak for themselves, and in connection with the scarcity of ships and the consequent low price for wheat in this market, demonstrate the great mistake which has been made.

Domestic products generally are in moderate demand at the quotations given below.

A private cable was received from Liverpool which gives the following quotations: California wheat 48s per quarter; Walla Walla 47s; Oregon 47s 6d to 48s. All on the basis of fair average quality, c f i, on iron vessels.

Market for Oregon salmon quotable at 22s 6d c f i, for incoming catch. There are no buyers.

SAN FRANCISCO MARKETS.

Review of Trade in All Departments.

[SPECIAL DISPATCH TO THE OREGONIAN.]

SAN FRANCISCO, April 15.—The supply of money at the banks continues large, and rates favor borrowers if security offered is perfectly unexceptable. There is some money needed in handling the wool clip now coming forward, but otherwise the demand for crops is insignificant. There is also very little inquiry for building or general business purposes. There are some indications of an improved demand for stocks.

We quote all kinds of paper at 8@10 per cent.

Drafts on New York are drawn at 25c for mail and 30c premium per $100 for telegraphic.

Exchange on London is 49¼d for bankers' bills, and 49⅜d for commercial bills.

Refined Silver—11¼@12 per cent. discount.

Mexican Dollars—Nominal at 91 buying and 91¾ selling.

Bags and Bagging—The favorable condition of the wheat plant adds tone to the market for wheat bags. There have been large transactions since the 1st of the month at full rates. A Calcutta vessel now en route will be here about the 1st of June if not before. The Pacific jute factory is understood to be running a full force. Spot lots are firm at 10½@10⅝c, and for June delivery rates are 10½@11c; wool bags 47½@55c for spot lots and 50@60c for June delivery; potato gunnies, 12½@14c apiece; hop cloth, 12@14c for spot goods, and 14@15c per yard for forward delivery.

Coffee—Central American grades are quiet at 15@16½c; Ceylon, 18@19c; Rio and Manila 15@16c; Java 26¼; ground coffee, 26¼c.

Coal—There are no cargo lots offering, and the quantity en route is comparatively small. Yards, however, are well supplied and local mines are yielding liberally. Cargo lots of Australian, English and Scotch are quoted at $6 25@7 50; West Hartley, $7 50@8; Eastern from ships' side is selling at $9@11 for anthracite and $12@13 for Cumberland; domestic Pacific coast descriptions are selling from wharf at $4@7; British Columbia $6@8 50. It is reported that the coal combination in Australia is broken, and that the competition likely to follow will enable shippers to send cargoes to this market.

Fish—The first consignment of this season's catch of Oregon canned salmon is at hand. Rates for May and June delivery are $1 20@1 25; special lots of last season's canning are nominal at $1 30@1 40; Pacific codfish, jobbing at 3@3¾c in bdls and 4½c for selected in 10lb bxs; 5@5½c for boneless; smoked herring, 45@60c for Puget Sound.

Leather—California sole 28@33c; harness 32@40; skirting, 32@37½c; calf skins, 70c@1 10 per lb; wax leather, 18@20c per foot; bridle, $4@7 per side; kip skins, $35@60 per dozen.

Lumber—Wholesale rates, Oregon pine in rough state, $17@21; laths, $3 50; shingles $1 75.

MARK LANE REPORT.

Review of English Crops and Markets.

[SPECIAL DISPATCH TO THE OREGONIAN.]

LONDON, April 15.—The *Mark Lane Express*, in its review of the corn trade for the past week says six weeks of thoroughly seasonable weather have made a wonderful change in the aspect of the country. Wheat is somewhat backward in some districts, but therefore not likely to suffer from any return of cold weather. Showers have somewhat delayed the completion of spring. Supplies of English wheat are again small both in London and in the provinces. Prices have declined a shilling, millers' requirements being light, and weather favorable for the future crop. There has been a marked decline in foreign wheat in London, caused by a speculative combination in America to dictate prices to Western Europe. Red winter wheat a fortnight ago was worth 57s per qr and sold with difficulty at 3s per qr decline. Russian sorts have not declined quite so decidedly, but the tendency in all cases have been averse to sellers. At the same time the decline stimulated the demand, and millers in some cases have bought comparatively freely. The proximate cause of the collapse of the ring was not so much abstention from buying on this side as favorable crop prospects in both England and America. Official estimates of stock and grain in London is larger than anticipated, namely, 280 000 qrs against 209,000 qrs at corresponding time last year. Compared with stock in granary at the beginning of the year, there is a decline of 2185 qrs.

Maize, in consequence of large arrivals received here, has declined 3@4s from the recent highest point. Mixed American ex ship is now 25s.

Arrivals at ports of call have been moderate.

Trade a very quiet for wheat at 1s@1s 6d lower, with only a moderate demand at the decline. It is not denied, however, that the continent has taken a considerable proportion of late arrivals.

Maize sold steadily but weaker at the close. Wheat for shipment was freely offered, but buyers continuing indisposed to operate, it declined fully 1s 6d. Maize was 6d lower.

Sales of English wheat last week were 21 640 qrs 43s 2d per quarter, against 52 930 qrs at 51s per quarter the previous year.

Imports into the United Kingdom during the week ending April 3d were 1 049 14 cwts wheat 144 052 cwt flour.

MIDDLE AGED MEN.

On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of a thin milkish hue, again changing to a dark and torpid appearance. There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness. Dr. S. will guarantee a perfect cure in all such cases, and a healthy restoration of the genito-urinary organs.
